

TIME & ATTENDANCE AND WORKFORCE MANAGEMENT SOLUTIONS – POWERED BY KABA

Keeping track of the comings and goings of a workforce is a near impossible task without the proper technology to support this important function. Although time and attendance as well as access control units are not a new invention, certain innovations are helping to make these technologies a vital source of information and provider of services and security in the workplace today.

Swicon360 believes that because we are a company that creates solutions, we are different from other providers who merely sell technology. We assess each client's needs to establish a company's unique solution reflecting their work environment and business processes and therefore contributing directly to their bottom line. In many cases, it is so much more than guiding a stream of people through the premises or factory floors.

Swicon360 Time aims to be your Human Capital Management (HCM) partner, wherever people, processes and technology meet, and has selected Kaba Workforce Management Solutions to add value to your business in this space.

KABA SAP® CERTIFIED SOLUTIONS FOR TIME & ATTENDANCE AND ACCESS CONTROL

In our overall strategy to provide holistic HCM Business Solutions, we found it necessary to develop a relationship with an established and well recognized time and attendance and access control solutions supplier, to ensure that all employee records are captured correctly right through the value chain, from entry to exit. Kaba

has developed solutions which enable the automation of data from capture through to processing, and its relationship with SAP on the HCM component allows for quick and easy integration into business processes.

Kaba is a global leader in Enterprise Data Collection (EDC) systems, which includes time and attendance and access control solutions, enabling the quick and error-free analysis of all time-related payroll and associated employee data.

With more than 20 sales and service bases throughout the world, Kaba has major offices in Germany, Austria, and Switzerland as well as subsidiaries in several other European and non-European countries, as well as in Swicon360 Time a certified Partner in Southern Africa.

The company has developed standard and certified interface software solutions for almost all of the major ERP systems. The Kaba product suite fully integrates with the SAP time and attendance and shop floor data collection solutions, as well as providing full access control, and has been successfully implemented at more than 1200 SAP customers globally.

Swicon360 Time will create customised solutions for time & attendance and access control for your company, using Kaba as our preferred supplier.

Kaba has a long history in the security industry. Since then, their most important focus has been turned to workforce management and access control solutions. Now, through Swicon360 Time, we bring their solutions to your business, ensuring that all employee time records and access rights are captured, checked and processed correctly.

Swicon360 Time has in-house Kaba-certified experts to ensure that the solutions that we roll out are designed, maintained and supported to the highest, exacting standards of Kaba's quality control. We are the sole Kaba-certified system integrators in South Africa, so we are your point of access to this essential HCM-related technology.

Although Kaba technology works on its own, it can be fully integrated with SAP, for further processing of the collected data in SAP HCM in order to enhance your investment in this global leading ERP software .
